

1. Open COMSOL Multiphysics for the first time

After logging into myAccess, applications will be available to you to add to your Citrix Receiver from the Apps button.

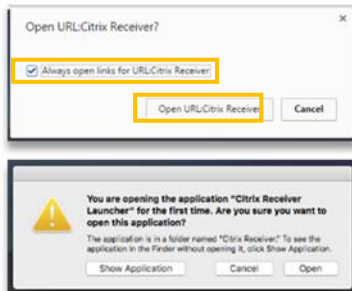

- ▶ Click on **Apps** and select **COMSOL Multiphysics** to open the application.

TIP: When launching your applications through Chrome, you may receive a one-off request to **Open URL Citrix Receiver**. Click **Always Open** followed by **Open URL: Citrix Receiver**.

You may also receive a one-off request to download and save a **.ica** file. Ensure to click on the small down arrow next to the **.ica** file and select **Always Open Files of This Type**.

Note: The following image is what Google Chrome will display, other browsers could vary in the message displayed.

- ▶ You have successfully opened **COMSOL Multiphysics**

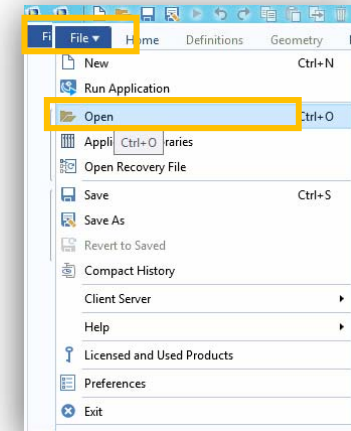

2. Import data into your COMSOL project file

The following steps assume that you will save your data to the **Cloud H:drive**, if you have saved elsewhere you will need to follow the same steps but look for the drive where your files are saved – see section 3.

TIP: Larger file sizes will take up more time to load the data set (possibly 20 minutes to open a 100MB file). It is highly recommended that when loading larger datasets you save the dataset onto **'Cloud H: Drive'** while on campus – this is the drive that starts with your zID.

Refer to [Downloading files from Moodle](#) guide for more information.

- ▶ Click on **File** and navigate to **Open**

TIP: You may be get a **Citrix Receiver – Security Warning**, click on **Permit All Access**.

Please note that the Security Warning window could slightly vary depending on which version of windows you have installed.

TIP: Remember to always save downloaded files straight to your **Cloud H:drive**

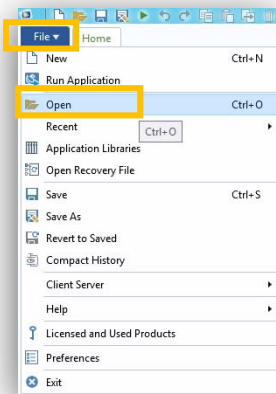

- ▶ On the **Open Data** page, select your data files from your **Cloud H:drive**.
- ▶ Once you find your data files in the **Cloud H:drive** simply double click on them OR click **Open** and COMSOL will open your data files.

TIP: If you can't find the Cloud H: Drive call the IT Service Centre on (02) 9385 1333

3. Manually locating your files

Click on **File** and navigate to **Open**

- ▶ If prompted, select Permit all access when the Citrix Receiver- Security Warning appears.
- ▶ Select your Local **C:drive** through the **This PC** menu.

- ▶ Once you find your data files in the **C:drive** double click on them OR click **Open** and COMSOL will open your data files.

4. Saving your data set

- ▶ To save either the **Data Output** or the **Data Set** click on **File** followed by **Save As**.

- ▶ From the dropdown menu select the **Cloud H:drive** and then select the **Save** option. Please ensure you do not save to the **Temporary Storage D Drive** as your data will be lost if you do so.

5. Printing from Comsol Multiphysics

Please ask your tutor regarding the proper use of COMSOL's 3D printing feature to print 3D models of your work.
